

Quilts for Kids October Block-of-the-Month

Disappearing Four-Patch

Fabric

Two 6-inch squares light print
Two 6-inch squares dark fabric

Directions

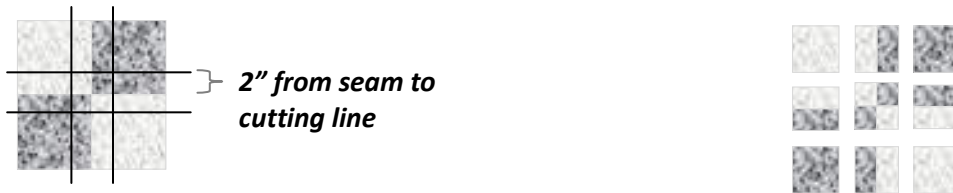

With right sides together, sew one light print 6-inch square to one dark print 6-inch square along one side using a quarter-inch seam. Open and press seam toward dark fabric. Repeat with the remaining light and dark squares.

With right sides together, place the two pieces together so that the darker fabric covers the lighter fabric, as shown below. Sew a quarter-inch seam along one long side. Open the block and either press to one side or press so that the center is twirled to make a nice, flat seam.

Here is where the fun begins. Using a ruler and your rotary cutter, cut the block apart 2 inches on either side of the two seams as shown below. This should yield 9 pieces from your block.

Keep all of these pieces in the same position except for the center pieces along each side. Flip each of these 180 degrees as shown below. Sew this block back together in this position. Do NOT trim this block. Turn it in as constructed, untrimmed.
